

SOLUTION SPEED FF™ 2

NEW FEATURES AND BENEFITS

DYNAWRAP TECHNOLOGY

Supportive panels that run from the base of the laces and over the forefoot improve support. This also keeps the foot more centered, even during the most dynamic movements.

SPLIT OUTSOLE

Separate front and back outsole to increase flexibility and significantly reduce weight for faster movement from the baseline.

SOFT AND RESPONSIVE CUSHIONING

Iconic ASICS FLYTEFOAM™ technology, now specifically designed for tennis to increase comfort.

TWISSTRUSS™ TECHNOLOGY

Designed to improve cutting motions, this technology supports the foot when making quick transitions or braking on court.

IMPROVED TRACTION

Redesigned outsole pattern to generate better traction for faster forward movement.

FASTER FROM THE BASELINE.

This is the promise of the new ASICS SOLUTION SPEED FF - launching January 2021.

Designed for the All-Court player, the new Solution Speed improves on all areas important for this playing style.

It's lighter, more flexible and more comfortable.

But don't take our word for it.

We've sent you an early pair - straight from the ASICS institute of Sport Science in Kobe Japan where it through intense testing, but now we would like to hear from you.

ONLY THREE PLAYING STYLES?

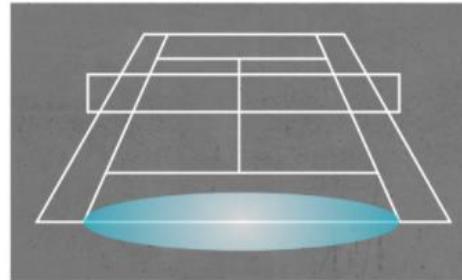

That's right.

We know there are hundreds of ways to classify style of play, however at ASICS, our job is to make it easier for you to find your perfect tennis shoe.

Playing in the wrong shoe can lead to injury, it's important to select a shoe that supports your style of play and natural movement of your body

Which is why we've spent extensive time speaking to tennis players and coaches to understand movement on court. This research led us to three categories: Baseline, All-Court and Best of Both.

BASELINE

For the more defensive player who typically moves **SIDE-TO-SIDE** at the very back of the court.

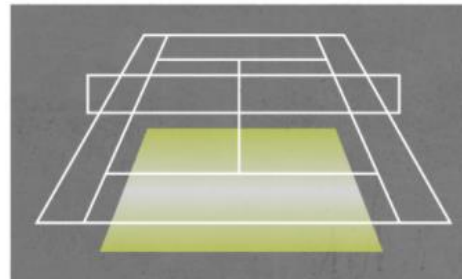

GEL-RESOLUTION™ 8

Dynawrap: secures your foot to the midsole of the shoe offering more stability

Full length outsole which improves both stability and grip

Dynawall: protects your foot during extreme lateral movement

ALL-COURT

For the more offensive player who moves from the **BASELINE TO THE NET** and everywhere in between.

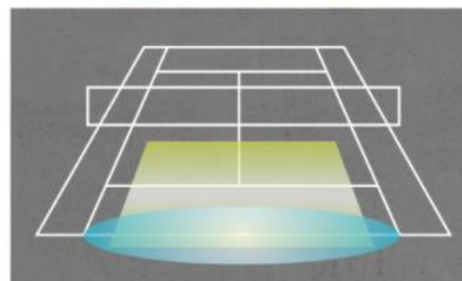

SOLUTION SPEED™ FF

Flytefoam: lightest midsole material specifically designed for tennis

Twisstruss: the perfect balance of support and flexibility

Split outsole: increases flexibility during dynamic movement

BEST OF BOTH

For the player who combines **BASELINE AND ALL-COURT**. This player can switch between powerful returns and quick volleys with ease.

COURT FF™ NOVAK

Monosock: provides increased comfort by holding the foot and ankle in place

Twisstruss: perfect balance of support and flexibility

Flytefoam: lightest midsole material specifically designed for tennis
